Authorization for this examiner's amendment was given in a telephone interview with Mirut P. Dalal on 28 August 2009.

The application has been amended as follows:

5. (Currently Amended) A system for de-interleaving audio information with static and dynamic buffers, the method comprising:

- a first static memory device;
- a de-interleaving engine;
- a second static memory device;
- a dynamic memory device; ~~and~~

an audio decoder, whereby interleaved first audio channel information is written into the first static memory device, de-interleaved by the de-interleaving engine, written into the second static memory device, and temporarily stored in the dynamic memory device[.];

wherein the interleaved first audio channel information is overwritten in the first static memory device by interleaved second audio channel information, the interleaved second audio channel information is de-interleaved by the de-interleaving engine, and the de-interleaved second audio channel information is written to the second static memory device[.]; and

wherein the interleaved second audio channel information in the first static memory device is overwritten by the de-interleaved first audio channel information from the dynamic memory device.

7. (Cancelled)

12. (Currently Amended) An application specific integrated circuit for de-interleaving audio information, the circuit comprising:

a first static memory device operatively connected to a de-interleaving engine;

a second static memory device also operatively connected to the de-interleaving engine;

a dynamic memory device operatively connected to the first and second static memory devices; and

an audio decoder operatively connected to the first and second static memory devices and the dynamic memory device, whereby interleaved first audio channel

information is written into the first static memory device, de-interleaved by the de-interleaving engine, written into the second static memory device, and temporarily stored in the dynamic memory device[.];

wherein the interleaved first audio channel information is overwritten in the first static memory device by interleaved second audio channel information, the interleaved second audio channel information is de-interleaved by the de-interleaving engine, the de-interleaved second audio channel information is written to the second static memory device[.]; and

***Allowable Subject Matter***

Claims 1 – 5, 8 – 12 and 15 – 18 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1, 5 and 12 are not explicitly taught nor made obvious by the prior art for the reasons set forth in Applicant's Appeal Brief filed 17 June 2009.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Drawings***

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings do not conform to U.S. practice. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.
